

NOTICE OF COMPLETION OF ENVIRONMENTAL REVIEW REPORT By Henvey Inlet Wind LP for a Transmission Line

Name: Henvey Inlet Wind Transmission Line

Description: Henvey Inlet Wind LP (HIW), a limited partnership between Pattern Renewable Holdings Canada ULC and Nigig Power Corporation, has undertaken an Environmental Review for the construction of a Transmission Line which will deliver electricity generated from the Henvey Inlet Wind Energy Centre (HIWEC), located on the Henvey Inlet First Nation Reserve No. 2 (HIFN I.R. #2), to the Ontario electricity grid. The proposed HIW Transmission Line is 86 km in length and travels south from HIFN I.R. #2, generally parallel to the future Highway 69/400 before diverting from Highway 69/400 to follow the existing 500 kV HONI Transmission Line System. This route connects to the HONI system at the 230 kV line southeast of Parry Sound. The HIW Transmission Line is subject to Ontario Regulation 116/01 and is subject to a "Category B" Environmental Review as described in the Ministry of the Environment and Climate Change's "Guide to Environmental Assessment Requirements for Electricity Projects" (the Guide) (January 2011).

Report Available for Review and Comment:

The Final Environmental Review Report, identified as Volume B, has been completed for the Transmission Line and includes a review of existing conditions, potential effects, mitigation measures, stakeholder input and a description of consultation activities undertaken during the EA process. The results of the studies undertaken indicate that the Transmission Line will have no significant net environmental effects, during construction, operation or decommissioning. HIW intends to proceed with the Transmission Line, subject to the application of mitigation measures and obtaining the necessary approvals.
